PROFESSIONAL SUMMARY

Infrastructure program and delivery director with experience spanning hands-on data center operations, network engineering, cloud delivery, and enterprise program leadership. Led infrastructure, security, ERP, and platform initiatives up to \$9M with global teams of up to 16 for organizations including Amazon, T-Mobile, GSK, and Sephora. Brings deep technical credibility with strengths in governance, financial management, vendor leadership, risk mitigation, and executive stakeholder alignment.

CORE QUALIFICATIONS

- Infrastructure Program & Portfolio Leadership — hands-on data center build-out plus network, security, and enterprise platforms
- Cloud Platforms — hands-on AWS/Azure environment setup for cloud-native delivery; GCP; Docker/container-based deployment
- Program Governance, PMO Standards & ITIL-Aligned Service Delivery
- Budget & Financial Ownership (CapEx/OpEx) — programs up to \$9M
- Vendor, Outsourcer & Offshore Team Management
- Executive Communication & Stakeholder Alignment
- Risk, Compliance & Business Continuity
- Cross-Functional Team Leadership — global teams up to 16

PROFESSIONAL EXPERIENCE

Independent Technology Consultant — Self-Employed

Mar 2024 – Present

- Own end-to-end technical delivery for client engagements, from discovery and architecture through implementation, deployment, and ongoing operations.
- Deliver production platforms spanning business operations, health/fitness data pipelines, and AI-assisted automation for independent clients — consistently containerized (Docker) for deployment and portability.

Senior Delivery Manager — Nortel US

Aug 2020 – Jan 2024

- Owned P&L and financial governance for concurrent enterprise accounts totaling up to \$6.3M, preparing weekly forecasts and performance reports for internal leadership and client stakeholders.
- Led cross-functional delivery teams and managed executive client relationships across concurrent enterprise engagements.
- Personally performed initial AWS/Azure environment setup for delivery teams building cloud-native enterprise systems; ongoing environment maintenance was owned by the team.
- Amazon Corporate Security: Architected and delivered an emergency lockdown system replacing legacy infrastructure, reducing facility activation from 40+ minutes to a single operation at building, campus, or regional scale; designed context-aware notification and controlled-egress logic.
- T-Mobile: Maintained security program continuity, vendor coordination, and stakeholder alignment during a senior leadership gap.

Director, AI/ML Product & Program Delivery — Publicis Sapient

Mar 2014 – Jun 2020

- Directed enterprise e-commerce, CMS, and AI/ML delivery programs for major retail and CPG clients; authored statements of work, owned program financials, and managed delivery-partner and vendor relationships.
- GlaxoSmithKline: Led a 16-person blended global team delivering a \$9M SAP ERP/WebSphere Commerce B2B platform integration in 10 months, with full governance over scope, budget, risk, and executive reporting.
- David Yurman: Recovered and delivered a commerce-platform migration against a fixed data-center-decommissioning deadline, leading a 12-person on-site team.
- Sephora: Led a 9-person technical team building a natural-language interface for an enterprise data catalog.

Senior Project Manager — Amplifi Commerce*Feb 2013 – Mar 2014*

- Brought in mid-engagement as sole on-site delivery lead to stabilize and launch a Nintendo customer-support portal, converting the engagement into follow-on work.
- Applied PMO governance frameworks — project definition, planning, resource allocation, risk and issue management — throughout the recovery.

Senior Project Manager, Enterprise Program Office — T-Mobile*Feb 2012 – Feb 2013*

- Led internal Adobe Experience Manager modernization initiatives; managed project financials and stakeholder alignment across enterprise IT.

Lead IT Program Manager — CenturyLink*2011 – 2012*

- Managed an eight-project enterprise infrastructure and applications portfolio, spanning self-service portals and an SAP ERP upgrade.

Sr. Security Software Project Manager — Verizon Business*2007 – 2011*

- Delivered enterprise security solutions and owned portfolio financials.
- Led an offshore development team — direct vendor and delivery-partner management.

SS7 Network Engineer / Team Lead — Cingular*2006 – 2007*

- Engineered SS7 backhaul and monitoring infrastructure for a national wireless carrier network; served as team lead.

Engineering Manager / Sr. Engineering Project Manager — Speakeasy Broadband*2004 – 2006*

- Served as data center manager for a regional broadband ISP — personally selected, procured, and physically built out infrastructure at the Westin datacenter in downtown Seattle: racked and cabled servers, core and edge network gear, NetApp filers, and EMC storage arrays.
- Managed network, systems, database, and security functions; supported a WiMAX pilot deployment.
- Owned the engineering P&L and was accountable for budgeting, forecasting, financial performance, and internal and external reporting across infrastructure and engineering operations.

Wi-Fi Project Manager / Network Engineer — T-Mobile USA*2003 – 2004*

- Engineered the initial Starbucks 802.11 Wi-Fi network and backhaul for a large-scale retail wireless infrastructure rollout.

SKILLS & TECHNOLOGIES

Infrastructure & Cloud: AWS, Azure, GCP, Data Center Operations, Network Infrastructure (SS7, Wi-Fi/802.11, WiMAX), Linux, Docker

Program & Delivery Leadership: Technical program management, PMO governance, ITIL-aligned service delivery, budget/P&L ownership (CapEx/OpEx), vendor & outsourcer management, executive communications, risk & compliance, Agile/Scrum, Jira, Confluence

Modern Engineering & Automation: Python, TypeScript/JavaScript, APIs, SQL, containerized deployment, AI-assisted workflows
